

Hello Class of 1974,

I hope you all have had a safe and fun summer!

I wanted to share a few photos and details of my summer with everyone.

Thankfully, I was able to secure an internship with Tesla despite everything that was going on at the beginning of this year. I was very happy and excited when I received news that I would be joining the Building Mechanical Design team. Although, it was an engineering position we still designed parts of the building which are crucial to its function such as the HVAC systems. I learned a lot and made a lot of new friends (I even got to test drive a Model Y)!

Despite never having traveled to the west coast, I packed up my bags and headed for Reno. I was very surprised to see how brown everything was compared to the east coast and I enjoyed getting to know the “biggest little city in the world.”

After quarantining I am now back in Ithaca and have started my final year. I am taking my regular studio course as well as a few architecture electives. Outside of AAP I have opted to take a ‘Plants in the Landscape’ class in which I will learn about flowers and plants native to the Northeast. The best part is our class takes place outside in the botanical gardens.

I hope everyone is well and healthy.

Please feel free to write to me,
